

## Installing ClamAV for Windows.

1) Uninstall Norton Anti Virus by following these steps. Your screen may look slightly different! Note that you may have to reboot your computer between each step, so just follow the instructions on your screen as you go along.

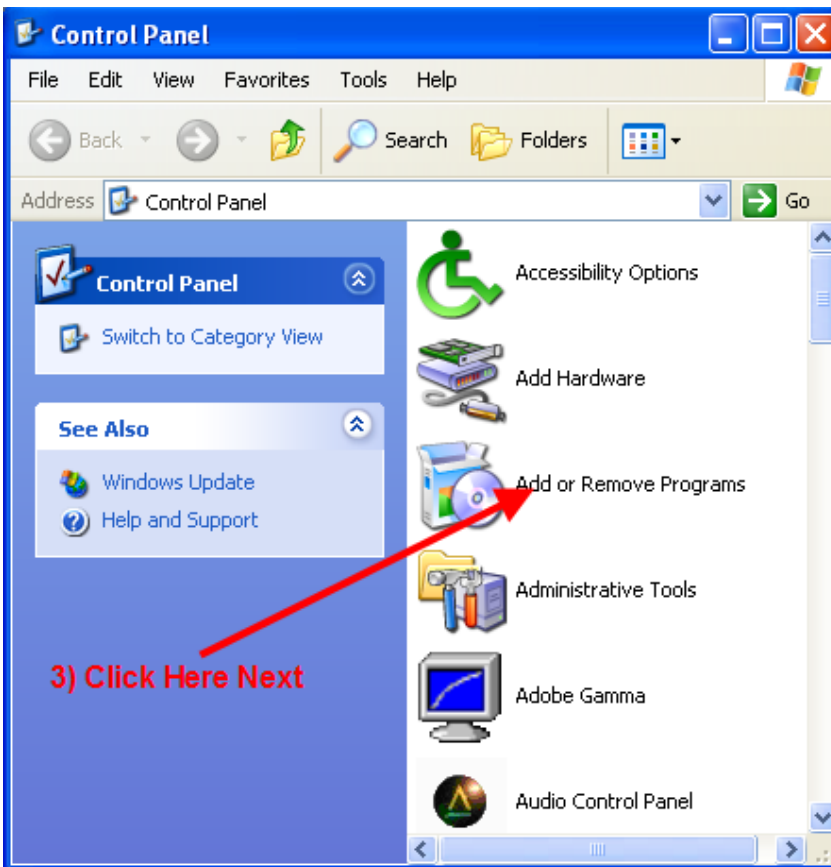

Illustration 2: Step 3

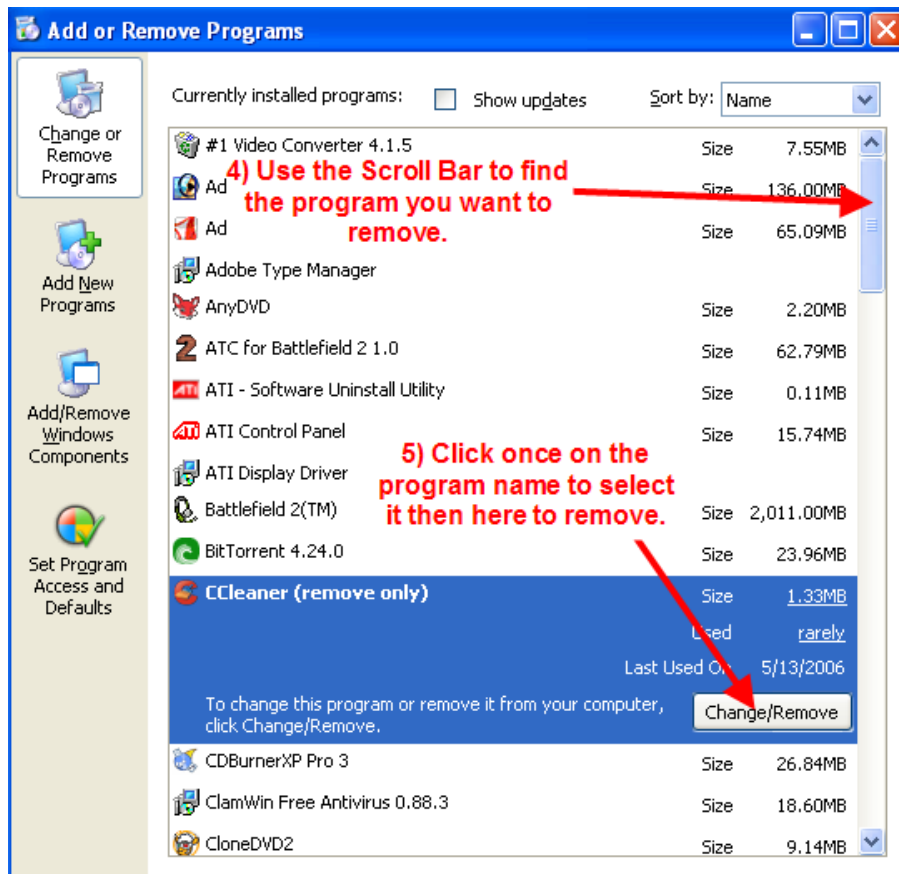

Illustration 3: Step 4 and 5

You **MUST** be sure to remove every trace of Norton and its associated programs, which means scan through the list of installed programs for any item that says “*Norton*” or “*Symantec*” or “*LiveUpdate*” ( - for example “Symantec LiveUpdate” or “Norton AntiVirus 2003”.)

2) Download ClamAV to your computer by opening your web browser and going to this link.

<http://www.clamwin.com/content/view/18/46/>

Click on the [**Download Now**] button and select the location nearest to you to download from. Follow the instructions to save the file to your computer. Remember, save it, don't open it. ***Be sure to note where the file is saving to!!***

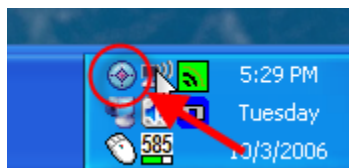

3) Double click on the icon that you just downloaded and follow the instructions on the screen below.

4) Complete all the steps as instructed. You should not need to change any settings during the install.

5) When you are finished, the install program will exit and you will see the following icon in the lower right corner of your screen.

6) All done! The program will keep itself updated automatically and you are all protected!
